

AWS + Dynatrace with AHEAD

Unifying Cloud Agility with Intelligent Observability

As enterprises accelerate their adoption of AWS, the complexity of operating at scale grows. Applications span hybrid environments, teams face pressure to modernize quickly, and organizations must balance innovation with cost efficiency and security.

AHEAD brings together the strengths of AWS's industry-leading cloud platform and Dynatrace's AI-driven observability to give enterprises the confidence to run faster, more securely, and with greater efficiency. By aligning our AWS expertise with Dynatrace's automation and insight, we help organizations maximize the value of their cloud investments and deliver reliable, differentiated digital experiences.

Why AHEAD?

AWS Premier Tier Partner & **2024 AWS Healthcare Partner of the Year** with a Strategic Collaboration Agreement, **6 Competencies**, and **450+ certifications**.

2024 & 2025 Dynatrace NORAM Partner of the Year award winner with deep experience in migrations, SaaS adoption, and ecosystem integrations.

A consultative approach backed by **outcome-oriented engineering** and managed services that scale.

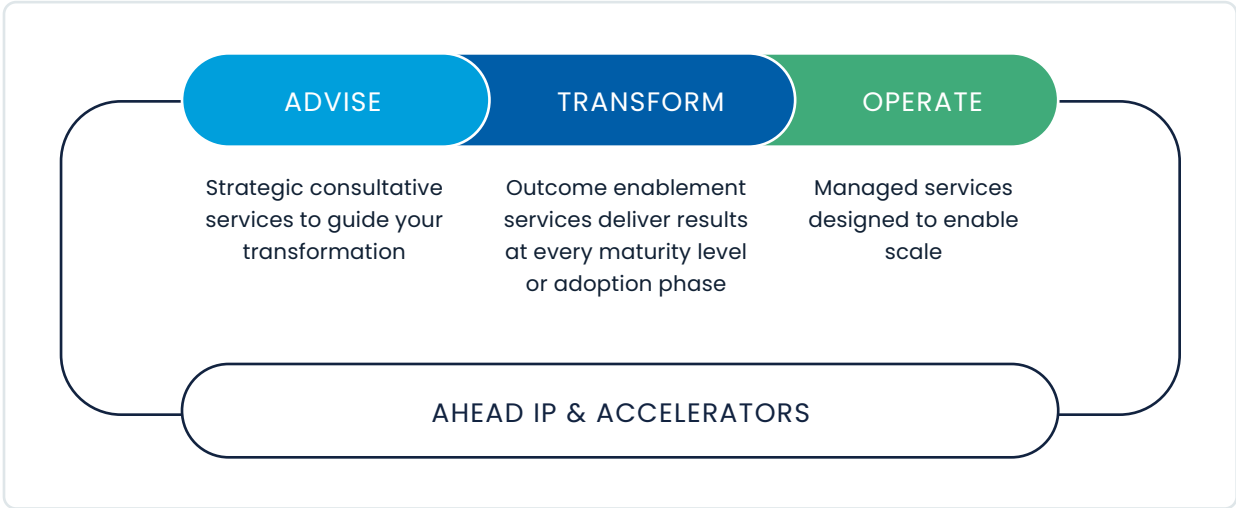

Proven success guiding Fortune 500 enterprises across industries including Healthcare, Finance, Retail, and Manufacturing.

Client Challenges We Solve

CHALLENGE	OUR SOLUTION
Cloud spend is hard to control without clear visibility.	AHEAD combines FinOps expertise with AWS cost analytics and Dynatrace observability to eliminate idle waste and align investments with business goals.
Application downtime and latency disrupt customer experience.	Dynatrace's AI-driven monitoring layered onto AWS workloads enables proactive detection, rapid root-cause analysis, and resilient digital platforms.
Cloud migration and modernization create operational blind spots.	AHEAD builds observability into AWS migrations from day one, reducing risk and accelerating transformation.
Developers lose time managing infrastructure instead of building applications.	AHEAD engineers AWS-based developer platforms enhanced with Dynatrace telemetry, giving teams automated environments and freeing them to focus on innovation.

AHEAD's Approach

We are accountable from **strategy through execution**, with services built to advise, transform, and operate at scale.

Advisory & Transformation

- **Cloud Migration & Modernization:** Align business and IT strategy to seamlessly move workloads to AWS with Dynatrace observability built in.
- **Data & AI Platforms:** Harness AWS data services with Dynatrace telemetry to turn raw data into trustworthy, actionable insights.
- **Observability Health Checks:** Analyze environments, uncover gaps, and design frameworks for proactive monitoring.

Operations & Managed Services

- **Cloud Networking & Security:** Secure hybrid environments while enabling scalable, high-performance connectivity.
- **Automation & AIOps:** Leverage Dynatrace Davis AI and AWS automation services to reduce MTTR, minimize alert fatigue, and speed remediation.
- **ServiceNow & Ecosystem Integration:** Tie observability into CMDB, ITOM, and automation workflows for closed-loop operations.

Proof of Performance

80%

Improved **cloud spend visibility by 80%** for a global medical device provider with AWS + Dynatrace FinOps integration.

40%

Increased **developer productivity by 40%** for a major airline through AWS platform engineering enhanced with Dynatrace monitoring.

15 Days

Reduced **end-to-end cloud deployment times by 15 days** for a leading manufacturer, streamlining AWS builds with automated observability pipelines.

Work with Us

The path to cloud agility requires more than AWS expertise or an observability platform in isolation. It takes the integration of both, engineered with scale and sustainability in mind.

With AHEAD, organizations gain a partner who not only implements technology but ensures it delivers measurable business outcomes. Together with AWS and Dynatrace, we help enterprises operate smarter, innovate faster, and deliver exceptional digital experiences.
