

Why AHEAD for Dynatrace

As a leading partner in observability and performance management, AHEAD leverages Dynatrace's AI-driven insights and automation to deliver comprehensive observability strategies across diverse platforms, applications, and cloud environments. Our deep partnerships with leading OEMs and cloud providers (AWS, Azure, GCP), along with our elite standings with ServiceNow, VMware, Cisco, and others, ensure end-to-end solution alignment and simplified vendor landscapes.

Elevate Your Observability with AHEAD's Expertise

Comprehensive Observability Expertise: We advise, design, implement, and manage robust observability strategies with Dynatrace's AI-driven insights and automation.

Broader Ecosystem Integration: Our deep partnerships with leading OEMs and cloud providers ensure end-to-end solution alignment and simplified vendor landscapes.

Accelerated Outcomes at Scale: Proven track record executing complex Dynatrace migrations from on-prem to cloud environments at global enterprises.

Reduced MTR & Improved Efficiency: Standardized frameworks, proprietary accelerators, and advanced telemetry pipelines deliver faster mean time to detect/respond and streamline operational costs.

Cultural Adoption & Enablement: Dedicated enablement services ensure teams quickly master Dynatrace capabilities, reinforcing sustained operational improvements, productivity boosts, and proactivity in addressing issues before they impact end-users.

Client Challenges

Ensuring Application Performance & Availability

Accelerating Digital Transformation

Reducing Operational Costs

Identifying & Preventing Security Risks

Proactively Detecting & Resolving Issues

AHEAD's Approach

Accountable from strategy through execution

Solutions / Service Portfolio

Health Check, Discovery, & Gap Analysis: Conduct health checks on existing Dynatrace environments and provide gap analysis with architectural recommendations for new feature enablement and compliance.

Compliance, Security, & Reporting Capabilities: Ensure regulatory compliance and provide robust security and reporting capabilities.

Managed to SaaS Migrations: Expertise in cloud migrations with AWS, Azure, and GCP.

ServiceNow Integration: Deep integrations in CMDB, ITOM, discovery, dependency mapping, HAM/SAM, and more.

Automation & AIOps: Intelligent event correlation (Davis AI) and integration with leading automation frameworks to minimize alert fatigue and streamline resolution.

Staff Augmentation: Enhance your organization's capacity to monitor, troubleshoot, and optimize systems by providing specialized expertise and scalable support.

Why AHEAD?

Holistic Visibility & Security Posture: Integrate observability data into a single pane, enhancing both operations and security responsiveness.

From Detection to Remediation: Unlike traditional managed services, we don't just identify issues—our engineering and architectural expertise helps fix root causes.

Future-Ready Innovation: Embrace next-gen capabilities (AIOps, Observability-as-Code, and SRE practices) to keep pace with evolving market demands.

Work with AHEAD

Take control of your application performance and user experience with Dynatrace, the leading observability platform designed for today's complex IT environments. See firsthand how Dynatrace's AI-driven insights and automated root-cause analysis can help you detect and resolve issues before they impact your business. Get in touch with us today to discover how AHEAD and Dynatrace can optimize your operations, reduce downtime, and deliver exceptional digital experiences.
